GREEN ENERGY - Innovative Biomass Cluster

was benchmarked according to a benchmarking approach developed and performed by the "European Secretariat for Cluster Analysis" of VDI/VDE Innovation + Technik GmbH (www.cluster-analysis.org). By participating in this benchmarking the cluster organization has expressed its interest in striving for cluster excellence and is awarded with the European Cluster Management Excellence label in BRONZE. The benchmarking took place on January 15th, 2013. The certificate expires on January 15th, 2015.

Database of benchmarked clusters

This database provides an overview of the clusters that have been benchmarked since November 2010. The list includes 465 clusters from 34 European countries.

Each cluster was analyzed based on an interview of the cluster manager conducted by an impartial ESCA benchmarking expert. The interview covers 36 indicators with regard to the structure of the cluster, the cluster management and the governance of the cluster, financing of the cluster management, services provided by the cluster management, contacts and interaction within the cluster and achievements and recognition of the cluster.

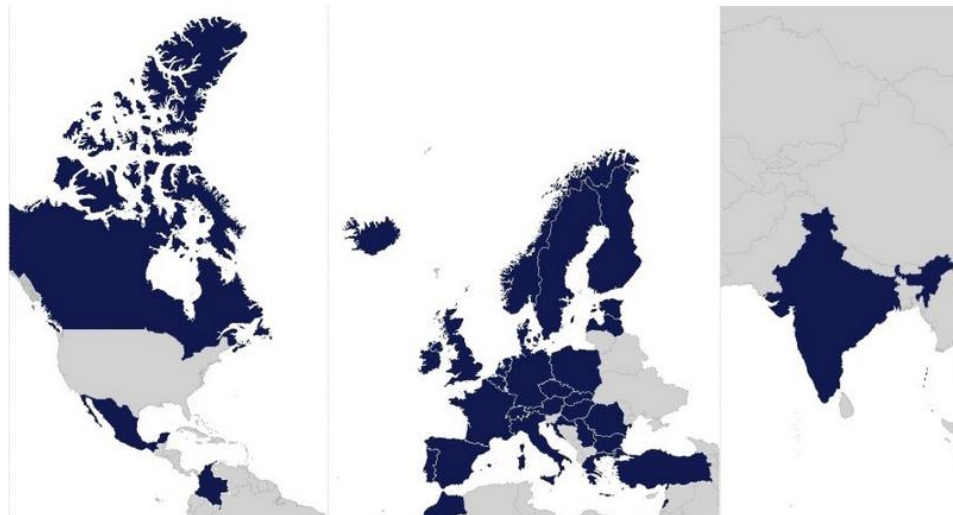

Results are presented by an individual report to the cluster management and include also recommendations for further improvement in line with the requirements of the cluster quality label that is currently developed by the European Cluster Excellence Initiative.
